

## Profile Summary

---

Detail-oriented and Motivated software developer skilled in web development and database management. Experienced in creating dynamic applications using Java, J2EE, JSP, HTML, CSS, and JavaScript. Developed projects such as InfoHub, an information aggregation platform, and BallotBoxPro, a secure voting application with real-time results. Certified in SQL (Basic and Intermediate) from HackerRank. Passionate about leveraging technology to enhance user experiences and solve real-world challenges.

## Technical Skills

---

- Programming Languages : java , HTML , CSS , JavaScript
- Databases : Oracle SQL
- Frameworks : J2EE, servlets, JDBC

## Projects

---

- **BallotBoxPro** -- Developed a dynamic web application, BallotBoxPro, allowing users to register, log in, and vote for political parties. Implemented user authentication and secure data storage using J2EE servlets and MySQL. Utilized JSP for session management and real-time voting results display, enhancing user engagement and simplifying the voting process.
- **InfoHub** -- Developed InfoHub, a dynamic web application enabling user registration, login, and management of personal information. Utilized HTML, CSS, and JavaScript for the frontend, and J2EE servlets for backend processing and database interactions. Implemented features for editing and deleting user details, demonstrating strong full-stack development skills.
- **The Dancing Snake** -- Developed a responsive Snake game using HTML, CSS, and JavaScript, implementing classic gameplay with simple controls. Designed for optimal performance across desktop and mobile devices. Hosted the project on GitHub for version control and collaboration.
